

Get it Right the First Time!

Automates Your Entire Bulk Seed Site from
Bin to Tender with One Control Panel

When you INVEST in USC's upgradable LX-PLC treater, you're getting the cadillac of the industry!

No need to buy a separate costly bin site control package later,
because The LX-PLC can be upgraded to control
any other manufacturer's bin site operation.

LX Series Seed Treaters are Upgradable, Programmable, Accurate and Easy to Control.

- The best treater series for automating your seed business
- Our seedwheel, flowmeter, quick release atomizer chamber, and PLC controls, are all standard on the LX series treaters
- USC engineers, designs, manufactures, installs and services bulk bin sites
- Full seed treating product line available
