

SIMPLE BIN SITE U-TREAT LITE

Keep it simple! USC's simple bin site panel easily converts upgradeable seed treating equipment to a full-functioning, bulk operation through a single and simple automation solution. Extend the life of current equipment, save resources and grow your operation with the most-trusted, intuitive and accurate automation platform on the market.

FEATURES & ADVANTAGES

- Automates bulk operations with straight-forward automation platform.
- Manages bin information, including: seed variety, seed size, lot number and inventory.
- Supports up to nine bins, two reversing underbin conveyors, three conveyors and one hopper.
- Conveniently call-in seed either by weight or SCU.
- Provides legal for trade scale tickets.
- Share indicator and ticket printer with LPX LITE automation, allowing for loss-in-weight seed metering.
- Supports up to 500 customers, seed and chemistry profiles, and recipes. Saves up to 5,000 on-screen or downloadable reports.
- Voltages: 240V 1PH, 240V 3PH, 480V 3PH, or 575V 3PH.
