DRIVE-OVER UNLOAD CONVEYOR

The drive-over unload conveyor is part of USC's field and fertilizer application product line. This conveyor moves seed at 10,000 bushel per hour on its 24-inch textured belt, providing a gentle transition for seed. USC's walk-over platform design provides accessibility to both sides of the conveyor while unloading. Its low profile and convenient, removable hitch makes this conveyor the most functional addition to your field operation. Check it out!
